Turn Your Website Into a 24/7 Lead Generation System

Do you have a website simply because you thought your business was supposed to have one?

Your website should be doing more than just looking good and sitting online.

I help home-service businesses get found on Google, attract more local customers, and turn that traffic into qualified leads through SEO, conversion-focused web design, and automated follow-up.

Instead of hoping customers find you—or watching interested visitors leave without taking action—you get a system designed **to bring in traffic, capture leads, and turn more of those leads into paying customers.**

- Website
- Lead
- Follow-Up
- Customer

More Leads

Faster Follow-Up

02 —— THE PROBLEM

Your Website Is Online. But Is It Actually Working for You?

Most home-service websites aren't necessarily bad—they're just passive.

They sit online waiting for someone to find them, hoping visitors know what to do next, and relying on you to manually follow up when an inquiry finally comes through.

That creates three common problems:

01

You're Hard to Find

Your ideal customers are already searching Google for the services you offer. If your business isn't showing up when and where they're searching, those jobs are going somewhere else.

SEO　Local Search　Google Visibility

02

Visitors Aren't Taking Action

Getting traffic isn't enough. If your website doesn't build trust, communicate your value, and make the next step obvious, potential customers leave without calling or requesting a quote.

UX　Web Design　Conversion

03

Leads Slip Through the Cracks

Even when someone does reach out, slow or inconsistent follow-up can mean losing a potential job to the business that responds first.

Automation　Lead Management　Follow-Up

A website shouldn't just represent your business online. It should actively help you generate business.

03 —— THE SYSTEM

One System. From Google Search to Paying Customer

Getting more customers online isn't about doing one thing well. More traffic won't help if your website doesn't convert—and more leads won't help if they aren't followed up with.

That's why I build the entire system around three things:

01

GET FOUND

Be there when local customers are searching.

Your customers are already searching Google for the services you provide. I use local SEO and search optimization to help your business appear in front of the right people at the moment they're looking for help.

SEO　Local Search　Google Visibility

02

CONVERT

Turn more of that traffic into real opportunities.

Once someone lands on your website, every page should move them closer to taking action. I design conversion-focused websites that build trust, answer the right questions, and make calling, booking, or requesting a quote easy.

Web Design　Landing Pages　Conversion Optimization

03

FOLLOW UP

Don't let a good lead go cold.

You're busy running your business—you shouldn't have to manually chase every inquiry. Automated follow-up helps you respond faster, keep potential customers engaged, and move qualified leads toward the next step.

Automation　Lead Management

AI-Powered Follow-Up

GET FOUND - - - - - CONVERT - - - - - FOLLOW UP

SEARCH - - - - - VISITOR - - - - - LEAD - - - - - CUSTOMER

More Traffic Is Only Valuable If It Turns Into Business.

Get Found → Convert → Follow Up

One connected system designed to help turn more local searches into leads—and more leads into customers.
